

Employee Attrition Analysis Project

Objective

Analyze employee attrition data and identify factors affecting employee turnover. Present findings through visualizations, insights, and recommendations.

Guidelines

1. Understand the dataset and create a data dictionary.
2. Perform data cleaning and handle data quality issues.
3. Identify numerical and categorical columns.
4. Conduct exploratory data analysis (EDA).
5. Calculate key HR metrics (KPIs).
6. Analyze attrition across different employee segments.
7. Identify patterns related to salary, overtime, job satisfaction, and work-life balance.
8. Create meaningful visualizations to support your analysis.
9. Build an interactive dashboard in Tableau or Power BI.
10. Summarize key insights from the analysis.
11. Provide business recommendations to reduce employee attrition.

Deliverables

- Data Cleaning Report
- EDA Report
- Dashboard
- Business Insights
